

THE STATIONARY MOTORIZED LARGE VENUE SCREEN FOR TRADE SHOWS, CONFERENCE HALLS, THEATERS AND CINEMAS

- Housing made of coated sheet steel, 1 mm thick, with square cross section. Colour of housing and bottom weight profile: white RAL-9003.
- Mounting brackets for direct ceiling installation are included in delivery, mounts for wall mounting optionally available.
- The trapezoidal bottom weight profile closes the protective housing flush when rolling up the screen surface; essential for integration in suspended ceilings. The bottom weight profile is equipped with an integrated equalization system .
- Easy and safe handling due to an electrical drive .
- Automatic electrical end switch at the top and bottom .
- With a sturdy maintenance-free tubular motor 230 Volt/50 Hz, protective class IP44, four wire connection, built-in thermal protection.
- Body-sound-insulated, maintenance-free special winding shaft, secured against torsion at the motor side, low noise and vibration-free.
- Motor and cable entry at the right from the point of viewer
- In-wall switch (Up/Stop/Down).
- Installation frame for integration in suspended ceilings as optional.
- Customized sizes, special colour of casing, different types of screen surfaces on request.

Metal construction of housing coated with colour RAL-9003
