

## PREMIUM MOTOR-DRIVEN PROJECTION SCREEN IN AN ALUMINIUM HOUSING WITH INTEGRATED GROOVES AT THE TOP OF HOUSING AND INSPECTION CLAP

- Protective aluminum housing is coated with white powder RAL 9003, square housing 10.5x10.5 cm up to width 300 cm, larger sizes 13x13 cm.
- Steel winding tube 60 mm (up to width 300 cm), 76 mm (up to width 350cm) or 89 mm (width 400cm).
- Varia-Mounting-System (VMS) for direct installation on walls or ceilings; easy installation by snap-in device with locking mechanism; this makes the fixing points of the screen adjustable to the structure conditions of rooms. The VMS-system allows the individual positioning of the installation angles over the complete length of the housing by means of a t-groove guide integrated into the top of the housing.
- Universal mounts on the wall or ceiling, from the width of 330 cm with reinforced design for safety installation.
- Complete open access to the projection screen surface through lower end flap; without need for creating an inspection opening (open access).
- Easy and safe handling due to automatic end switch when screen is rolled up and down.
- Motor with silent gearbox design, the upper end position is also provided with an additional micro switch, which eliminates surface dimension changes due to temperature and humidity.
- The trapezoidal bottom weight profile closes the protective housing flush by means of a micro-switch when rolling up the screen surface.
- Optimized flatness of screen surface Blankana SP by an edge stabiliser, which will be coated at the reverse of the screen surface.
- Installation frame BASIC and PLUS as optional accessories.

Complete open access to the screen surface

Reinforced design of mounts from the width 330 cm
